

  
World leaders in the profile bending industry

Shaping  
the future  
through  
**better  
design**

We manufacture shaped uPVC door and window frames in a wide range of colours and finishes. All frames are made to bespoke dimensions in the following shapes:

- Angled or Gable Ends
- Circular Windows
- D Frames
- Arched or Frames with a Swept Head
- Gothic Shaped Frames
- Shaped Sliding Sash Windows
- Doors with shaped frames

Thanks to investment in a state of the art CAD machine, we can also supply shaped double glazed units, or glass sizes if our customers would prefer to source the glass themselves.

## **Why choose Universal Arches?**

At Universal Arches, we take great pride in offering quality shaped door frames and windows, quality service and quality standards.

In addition we offer:

- 5 - 7 working day turnaround
- Fully welded, high quality finish
- CAD Drawings
- ISO 9001:2015

We deliver our shaped door and window frames within a 50 mile radius of St Helens free of charge. Glass can also be supplied within a 50 miles radius. For deliveries outside of this area, we can supply a glass template which you can use to order your own glass locally.

Innovation, flexibility and unbeatable service. It's how we are shaping the future...

- ✓ Professionally Engineered
- ✓ Quality
- ✓ Right 1st Time
- ✓ Fit & Forget

We offer a vast array of bespoke window and door designs and even a combination of both. As you would expect from a market leader, Universal Arches manufactures angled frames and gable frames for conservatories, circular windows, D frames, arches, gothic frames, vertical sliding windows, doors and the most complex bespoke frames.

Within the factory at Universal Arches we have all the technology, tools and expertise to transform lengths of uPVC profile and convert them into high quality shaped frames with impressive accuracy.

Quality products and Quality standards are high on the list of priorities at Universal Arches, which is why we have held ISO Accreditation continuously since 2004.

Universal Arches has two Quality Controllers and a Quality Manager. They use the ISO standard to monitor the uPVC Profile Bending process from start to finish.

ISO 9001 contains eight key principles of quality management which form the fundamental characteristics of quality management

We have been bending uPVC profile since 1994. Many of our highly skilled Craftsmen have been in our employment for over 15 years, having been trained in-house, using specialised skills and technology developed over two decades.

# Universal Arches

"We don't do square around here."

Universal Arches is part of a medium sized, privately owned group of specialist fenestration companies. All market leaders in their own right, operating in niche sectors as true manufacturing specialists of bespoke products.
